EDUCATION

Carnegie Mellon University (CMU) **Pittsburgh, PA**

M.S. Information Technology - Information Security | Cyber Forensics and Incident Response Track *August 2025 - May 2027*

- **GPA:** 3.96 | **Relevant Coursework:** Information Security, Host & Network Forensics, Cyber Risk Modeling, Computer Systems, Computer Network, Machine Learning

University of California, Los Angeles (UCLA) **Los Angeles, CA**

B.S. Computer Science and Engineering | Entrepreneurship Minor *September 2021 - June 2025*

- **GPA:** 3.81 | **Relevant Coursework:** Computer System Security, Artificial Intelligence, VR & XR Security, Cryptography, Operating Systems, Computer Network, Computer Organization, Algorithms & Complexity, Software Construction

WORK EXPERIENCE

Carnegie Mellon University **Moffett Field, CA**

Master's Thesis Researcher *Aug 2026 – Present*

- Investigate how email scams change when the target isn't a person but an AI assistant that reads and acts on emails.
- Compares traditional phishing emails with newer prompt-injection attacks to see whether they can be told apart.
- Tests how well different detection tools catch each type and what that means for protecting people and AI systems from fraud

Carnegie Mellon University - Security & AI Research Lab **Pittsburgh, PA**

Graduate Research Assistant *May 2026 – Present*

- Analyzes experiments across multiple providers and protocols to compare device power draw and network path behaviour
- Develop tools for experiment-quality validation, IP metadata enrichment for network attribution, and data analysis
- Findings show VPN encryption substantially lengthens network paths and introduces additional network operators

University of California, Los Angeles **Los Angeles, CA**

Undergraduate Research Assistant *May 2024 – June 2025*

- Studied 5 research papers on software security analysis & detection tools, virtual reality systems, and existing vulnerabilities
- Analyzed 100+ source codes and libraries from Unity and Unreal Engine to find vulnerabilities and identify patterns
- Created vulnerability detection software for virtual reality applications based on identified patterns from 100+ assets

Ministry of Digital Economy and Society **Bangkok, Thailand**

ThaiCERT Statistic Analysis Intern *July 2024 – August 2024*

- Investigated cybercrime activities using Group IB and wrote 20+ daily reports on activities and potential dangers
- Drafted 4 weekly reports compiling 10k+ records separated by sectors, critical levels, and types of attacks
- Translated 5+ articles related to cybersecurity from English to Thai, ensuring relevant information is preserved

PROJECTS

Honda 99P Lab **Moffett Field, CA**

Source Credibility Reasoning In Bodies of Evidence *Aug 2026 - Present*

- Built a company-strategy monitoring system for business analysts that ingests sources and evaluates credibility
- Architected a multi-source document pipeline that collects 15,000+ filings and ~113 news providers across 12 reliability tiers
- Implemented a hierarchical Bayesian truth-discovery model that learns per-source credibility to arbitrate conflicting claims

CMU Cyber Risk Modeling **Pittsburgh, PA**

Secure Skies, Inc. - Cyber Risk Modeling *Jan 2026 - May 2026*

- Conducted a comprehensive cyber risk assessment evaluating CMMC Level 2 compliance against NIST requirements.
- Applied MITRE ATT&CK frameworks to identify vulnerabilities, model cyber risks, and estimate potential financial losses
- Developed a prioritized 18-month remediation roadmap to strengthen security controls and improve compliance readiness.

SKILLS & INTERESTS

- **Programming Languages:** Java, C++, C, Python, HTML, CSS, JavaScript, Node/React
- **Applications:** VS Code, Microsoft Office, Google Suite, Windows OS, Linux OS, Cisco Networking, Wireshark
- **Skills:** Leadership, Communication, Analytical, Problem Solving, Critical Thinking
- **Languages:** English (Fluent), Thai (Fluent)
